InterPlater 85/125/150T HDX

InterPlater 85/125/150T HDX is our new high-end thermal plate processor generation – targeted directly at the high-end commercial printing market .

We have added innovative features that enable even higher quality and productivity for the high-end commercial market. The processor generation is designed to meet the specific requirements of today’s thermal [CtP](#) plates and platesetters from all major manufacturers.

InterPlater 85/125/150T HDX is the reliable thermal CtP processor that supports high-end commercial applications and integrates the latest principles of thermal plate processing. These elements perfectly match the high demands of quality and precision in the entire printing process.

Key Benefits:

- User-friendly graphical touch screen control panel with optional native language plug-in
- Optional Remote Enabling System plug-in
- Productivity of +300 pph and a linear speed of 2.2 m/min the processor matches the performance of the fastest setters
- Easy-lift top cover provides access to brush, rollers, spray bars and guides, and they are replaced in minutes – without the use of tools and without the need to re-calibrate brush and roller
- All main electrical control boards and power supply have been conveniently collected in one drawer under the processor
